

/// Vira Series

The Vira Series of LED wall lights offer a quality lighting solution to suit everyday projects. Using an aluminium reflector behind a tempered glass lens a powder coated body and IP54 protection, these fixtures are suited to indoor and semi outdoor applications such as stair or path lighting or as night lights in corridors, hotels or hospitals. Using an external driver, these fixtures are highly controllable using protocols such as DALI2 or even wirelessly from DALI+ or Casambi systems.
